**Systems for the Maintenance  
of Water-Miscible  
Cooling Lubricants**

**ENERGY EFFICIENT**

**MODULAR**

**COMPACT**

## Mixing and Dosing System

- + High-precision, highly efficient fully automatic mixing and dosing system.
- + Tank size up to 10,000 litres.
- + For multiple machine connections, volume reductions must be taken into account.

## Extraction System

Extraction system for the removal of process-destabilising pollutants. This achieves a significant increase in the service life of the cooling lubricant.

**Dosing systems of the future**

We produce everything according to customer requirements ranging from the standard system to a customized complete solution

**ALL FROM ONE SOURCE**

**VOMAT®**

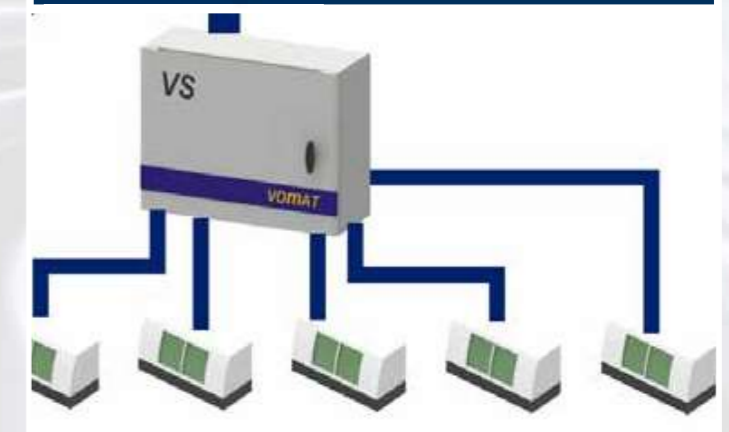

Installation and commissioning of the complete system including piping on customer request

## Analysis System

Analysis system for determining the contents of process-destabilising pollutants.

## Distribution System

Distribution system for the realisation of a multi-machine connection situation.
